A400 Xplor ACTION

Now in 20 Gauge!

It's the shotgun that counts.

A400 XPLOR Action

The new Beretta A400 Xplor Action is much more than a semi-automatic that does everything well. It's the semi-automatic that does everything as well as a Beretta. In designing the new Beretta A400 Xplor Action our objective was to make the world's most versatile shotgun even better. We retained all the features that have made the A400 series such a success in a lightweight shotgun. The result? Enhanced pointability, balance and ease of swing. It's the semi-automatic you can use with absolute confidence regardless of game, target or season. The receiver also comes with scope mount grooves to accept optics and other aiming systems.
