

The SUPER GHOST Ultimate

New holster GHOST is studied and built particularly for I.P.S.C. and U.S.P.S.A According to the shooters' needs and experiences we made new holster thinking about simplicity, security and practicality. The **ULTIMATE GHOST** holster gives many solutions for any shooter and consents SECURITY and FAST. It is built with high industry materials and methodologies, and has passed the most severe tests.

Use the white screws to get a gun fixed in the holster.

- a) The FASTEST possible draw: the pistol can be drawn with 2 MOVEMENTS first high up "3MM, then forward" thanks to the sphere blocking system on the gun itself.
- b) Possibility of regulating the intensity of the sphere blocking system (according to your needs) by replacing the compression spring that is given as a sphere part in the set .
- c) More security: the pistol can be blocked in the holster with a fast release operating on the sphere by blocking it
- d) The GHOST height can be regulated, according to your needs, operating on the blocking screws and the pieces of set.
- e) The GHOST, thanks to its simple device (by screws), allows the regulation of the gun inclination for the best grip. Insert the pistol safety, push the "button" and turn-up, if you want to block the gun inside in relax position. When you need a retention position push the button and turn-down. In order to unlock it quickly pull-up the lever and draw the pistol.

WARNING !!

READ THE FOLLOWING BEFORE USING AMADINI GHOST HOLSTER

- Use of a handgun under any condition may be dangerous - Great care should be taken when placing or drawing a handgun from its holster. -Before placing a loaded handgun in the holster, try the fit with an unloaded handgun. - Carrying any handgun with a live cartridge in the chamber may cause an accidental discharge - Cocking the holstered handgun may cause great danger - Modifications made to the weapon, such as the use of trigger shoes or grip adapters, may change the position of the handgun in the holster and may lead to unsafe and extremely dangerous condition. - Alterations made to an AMADINI Ghost Holster or the placement of an inappropriate gun, for which the holster was not built for, may cause dangerous condition. - It is also the user's responsibility to regularly check the holster and its hardware. Should it become defective, broken, or worn, cease use immediately - If your holster is built with tension screws, we recommend you check and adjust before each use. - To avoid movement of the handgun in the holster, please be certain that your gun is fixed. - To prevent movement keep your thumb on back of the hammer or slide when inserting. - Keep your fingers away from the trigger when drawing or replacing handgun in holster - During physical activity the gun should be held in place with your hand to prevent it from dropping. Beretta by **AMADINI GHOST HOLSTER** reserves every right to introduce any modification to its items for improvement or order trade purpose without notice. No returns will be accepted without prior factory authorization.
